

Detection Results on ROM

(a) Real:

Caption: Her speech now history, Jodie Foster attended the Weinstein Company’s party on Sunday night at the Beverly Hilton.

GT: Real

REFORM++ Answer: Real

REFORM++ Reasoning: The image shows a woman in a formal dress at a social event, which aligns with the context of attending a party mentioned in the news text. The setting appears to be a high-profile gathering, consistent with the Beverly Hilton event. The woman's attire and demeanor suggest she is a figure of authority, fitting the description of Jodie Foster. The background includes other people and a warm ambiance, typical of events attended by prominent figures like the Weinstein Company. These elements support the authenticity of the news item, indicating that the image and text are consistent with a real event.

Caption: Most Dangerous Man in America W. E. B. Du Bois From left, Petronia Paley, Art McFarland, Michael Basile and Marie Guinier in this New Federal Theater production at Castillo Theater.

GT: Real

REFORM++ Answer: Real

REFORM++ Reasoning: The image shows four actors on stage, which aligns with the news text describing a production of "Most Dangerous Man in America W. E. B. Du Bois" at the Castillo Theater. The actors' positions and attire suggest a theatrical setting, consistent with a theater production. The text provides specific details about the production, including the names of the actors and the location, which add credibility to the authenticity of the image and text. There are no visible signs of manipulation or inconsistency between the image and the text, supporting the conclusion that this is real news.

(b) Face-level Manipulation:

Caption: HaTae-kwon is a martial artist who has achieved a high level of skill in his craft. He is seen here in a black and white photo.

GT: Image: Face swap; Text: Fully rewritten.
Fake area<loc_63><loc_68><loc_108><loc_113>

REFORM++ Answer: Image: Face swap; Text: Fully rewritten.
Fake area<loc_67><loc_67><loc_103><loc_111>

REFORM++ Reasoning: The image shows a person in a black and white photo, dressed in formal attire, which aligns with the description of HaTae-kwon as a martial artist. However, the face appears to be digitally swapped, as it does not match the expected appearance of HaTae-kwon, who is known for his distinctive features. The text mentions his high level of skill, which is not visually supported by the image. The pose and attire suggest a formal or artistic setting, but the facial features seem out of place, indicating manipulation. The combination of a generic description and a face swap suggests the image and text are not authentic and have been altered.

Caption: Masahiro Tanaka to Join Sendai's Professional Sports Team, Announces Exciting New Chapter in Japanese Baseball

GT: Image: Face attribute; Text: Fully rewritten.
Fake area<loc_117><loc_93><loc_340><loc_316>

REFORM++ Answer: Image: Face attribute; Text: Fully rewritten.
Fake area<loc_139><loc_118><loc_324><loc_304>

REFORM++ Reasoning: The image shows a man in a suit, but there are signs that suggest face attribute editing. The facial features appear slightly unnatural or mismatched, which can be a sign of manipulation. Additionally, the lighting and shadows on the face do not perfectly align with the rest of the image, further hinting at possible digital alteration. The accompanying text claims that Masahiro Tanaka will join Sendai's professional sports team. However, there is no widely recognized figure by that name associated with this name in major sports events. The language used in the text is generic and lacks specific details that would typically be present in legitimate announcements. These elements combined suggest that the image and text are likely manipulated and AI-generated.

Caption: The artist Suheil Baqaeeen helped a student with a drawing while classmates looked on.

GT: Image: Face swap; Text: No.
Fake area<loc_234><loc_33><loc_264><loc_64>

REFORM++ Answer: Image: Face swap; Text: No.
Fake area<loc_237><loc_31><loc_259><loc_63>

REFORM++ Reasoning: The image shows an artist interacting with a student at a table, which aligns with the news text describing Suheil Baqaeeen assisting students with a drawing. However, upon close inspection, the facial features of the artist appear to be inconsistent with the known appearance of Suheil Baqaeeen, suggesting a face swap. The rest of the scene, including the students' engagement and the setting, matches the description in the text. This discrepancy indicates that while the text is likely original and accurate, the image has been manipulated using face swap technology.

Caption: Prime Minister David Cameron of Britain is in a tight race ahead of Thursday's elections.

GT: Image: Face attribute; Text: No.
Fake area<loc_425><loc_146><loc_461><loc_182>

REFORM++ Answer: Image: Face attribute; Text: No.
Fake area<loc_411><loc_140><loc_460><loc_179>

REFORM++ Reasoning: The image shows a man who appears to be David Cameron, the Prime Minister, walking among a crowd. However, upon close inspection, it seems that his facial features may have been altered or edited, which is a common indication of face attribute editing. The text accompanying the image states that Prime Minister David Cameron is in a tight race ahead of Thursday's elections, which is factual and aligns with his political role. The discrepancy between the image and the text suggests that while the text is likely authentic, the image has been manipulated to alter the facial attributes, possibly to misrepresent or caricature certain individuals. This supports the conclusion that the image is a face attribute edit, while the text remains original.

(c) Scene-level Manipulation:

Caption: Robert Elliston, chief operating officer of the Breeders’ Cup, in Bal Harbour, Fla., one of his favorite places to visit.

GT: Image: Inpainted background; Text: No.

REFORM++ Answer: Image: Inpainted background; Text: No.

REFORM++ Reasoning: The image shows a man standing on a dock with a serene body of water and lush greenery in the background. The text mentions Robert Elliston, the chief operating officer of the Breeders’ Cup as part of his favorite places to visit. The key evidence suggesting background replacement is the incongruity between the calm, tropical water typical of Bal Harbour and the description of Elliston's favorite location. Typically, in such a setting, the background would not match the expected environment of a high-profile executive like the Breeders’ Cup. The serene water and lush greenery are not characteristic of a prime location like Bal Harbour. This discrepancy indicates that the background may have been digitally altered to create a different setting than what the text describes.

Caption: Julia Blackburn Celebrated Author and Environmental Advocate Honored for Her Work on Sustainability and Conservation

GT: Image: Inpainted background; Text: Fully rewritten.

REFORM++ Answer: Image: Inpainted background; Text: Fully rewritten.

REFORM++ Reasoning: The image shows an elderly woman standing indoors with a window in the background, which appears to have been replaced. The background features a large green plant, which seems to be a different setting than typically associated with an author or environmental advocate. This suggests manipulation for context. The text claims that Julia Blackburn is celebrated as an author and environmental advocate, but there is no verifiable information or context provided to confirm her involvement or the authenticity of the event. The combination of the incongruous background and the lack of supporting details in the text points to a deliberate attempt to create a misleading narrative.

Caption: In a heartwarming story of resilience, Bruce Abbott shares his inspiring journey from a humble wooden cabin to a life of hope and determination. Despite facing adversity, Abbott's unwavering spirit

GT: Image: Whole generated; Text: Fully rewritten.

REFORM++ Answer: Image: Whole generated; Text: Fully rewritten.

REFORM++ Reasoning: The image depicts a person sitting on a bed in a wooden cabin, which appears to be generated by Stable Diffusion due to its stylistic elements typical of AI-generated images. The lighting and details, such as the patterned cloth and the rustic setting, lack the natural imperfections often found in real photographs, suggesting artificial creation. The text describes Bruce Abbott's journey, highlighting his resilience and hope. However, given that the image is generated, it may not accurately reflect real-life events or individuals. The narrative seems exaggerated and lacks specific details that would be expected in genuine news stories. The combination of a visually artificial image and a generic, inspirational story suggests manipulation aimed at creating a compelling but false narrative.

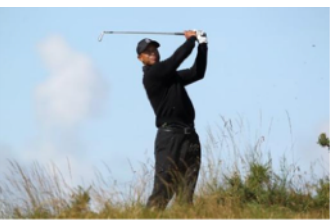

Caption: Boise State quarterback Kellen Moore finished with three touchdown passes.

GT: Image: Whole generated; Text: No.

REFORM++ Answer: Image: Whole generated; Text: No.

REFORM++ Reasoning: The image depicts a football player wearing a Boise State jersey with the number 11, which aligns with the news text about Boise State quarterback Kellen Moore. The jersey features the "WAC" logo, a known college football team. However, the player's features and overall appearance suggest that the image is generated rather than a real photograph. This discrepancy indicates that while the text is factual and refers to a real event involving Boise State's quarterback, the image is not a genuine depiction of the event. The mismatch in visual details supports the conclusion that it is generated by Stable Diffusion, while the text remains original and unaltered.

(d) Text Fabrication:

Caption: Tiger Woods Dominates at Royal Liverpool, Clinches Thrilling Victory in Epic Comeback Performance.

GT: Image: No; Text: Fully rewritten.

REFORM++ Answer: Image: No; Text: Fully rewritten.

REFORM++ Reasoning: The image shows a professional golfer swinging a club on a golf course, which is semantically related to the caption and does not indicate any visible image manipulation. However, the image provides only limited visual evidence and cannot verify the specific claims that the event is an epic comeback victory. Such an exaggerated and highly specific narrative is not credible based on the image alone, especially because the claimed victory and comeback are rare event-level details requiring external confirmation. This suggests that the caption has likely been fully rewritten with fabricated or overstated information.

Caption: Josh Sapan, CEO of AMC Networks, stands confidently in front of a promotional poster for "The Walking Dead," highlighting the show's return on AMC.

GT: Image: No; Text: Fully rewritten.

REFORM++ Answer: Image: No; Text: Fully rewritten.

REFORM++ Reasoning: The image shows a man standing in front of a promotional poster for "The Walking Dead," but the text contains inaccuracies that suggest it was maliciously generated by an AI language model. Firstly, Josh Sapan is not known to have appeared on the show "The Walking Dead" at the time of publication. This discrepancy indicates a factual error, as the image itself does not provide any definitive evidence linking the individual to the show or to the series. Additionally, the text mentions the return on AMC, but without verification from the image, it cannot confirm the authenticity of the event or person. These inconsistencies support the conclusion that the text has been manipulated.
